a) Mountain View Road and Camp Mohave Road Intersection:

In 2025, Mountain View Road was constructed and open to travel between Aztec Road and Camp Mohave Road as well as Garner Road and Sterling Road. The Project created a new Mountain View south leg at its intersection at Camp Mohave Road.

Mountain View Road

- Section Line / Arterial Road – 35 mph
- STOP-controlled on NB and SB approaches

Camp Mohave Road

- Section Line / Arterial Road – 35 mph
- Uncontrolled

This study will evaluate intersection STOP control on basis of (1) All-Way STOP and (2) reassignment of minor road and STOP control.

RECOMMENDATION

Install R1-1 STOP signs on the EB and WB Camp Mohave Road approaches to Mountain View Road. Install R1-3P ALL-WAY Plaque on all intersection STOP signs.

b) Intersection Control Study of Morningside Drive and Wood Camp Drive

The intersection is currently formed by two uncontrolled roadways. Historically, Morningside Drive has functioned as the primary route for local residents. However, with recent development along Wood Camp Drive, traffic volumes are increasing, and concerns have been raised regarding intersection safety.

This study evaluates the need and justification for implementing STOP control at the intersection of Wood Camp Drive and Morningside Drive.

RECOMMENDATION

Per the MUTCD, Section 2B.11, STOP control is recommended for Wood Camp Drive at its intersection with Morningside Drive for both the northeastbound and southwestbound approaches. This recommendation is based on the need to clearly assign vehicular right-of-way to improve safety and operational performance, particularly under the current uncontrolled conditions where conflict risk may increase due to ongoing development and community growth.
